At Central Physical Therapy, our patients come first. We continue to closely monitor the impacts of Coronavirus (COVID-19) and strive to ensure the health and safety of our patients, staff and community.

Central PT has developed an aggressive infection control plan designed to keep all of our patients and staff safe. We have our entire facility sprayed with Vital Oxide to destroy and continue to destroy virus for 4-5 weeks after application

We are striving diligently to make your treatment at Central PT safe for all concerned.

All staff upon arrival to work have their temperature and oxygen checked and thoroughly wash their hands according to CDC handwashing protocol.

Each staff member washes their hands prior to hands on care and again after finishing with their patient.

In addition to each staff member sanitizing all treatment equipment and facilities after each patient's treatment session, our maintenance staff is continually cleaning and sanitizing during the day all surfaces of staff and patient contact.

All patients, upon arrival for their appointment are asked to use hand sanitizer located in multiple locations in the Lobby area before interacting with CPT staff or patients.

All patients will have their temperature and oxygen taken prior to entering the building. If a patient has a temperature of 100.4 or more, that person will be asked to leave, contact their Primary Care Provider and call for their next Therapy appointment after being cleared by their PCP and their temperature is below 100.4.

Our Aquatics Therapy pool continues to maintain strictest standards for sanitation and cleanliness to current established guidelines for Aquatic Therapy

Thank you for your patience and understanding as we work to keep everyone safe
